CONNECTING TECHNOLOGY
CREATING THE FUTURE

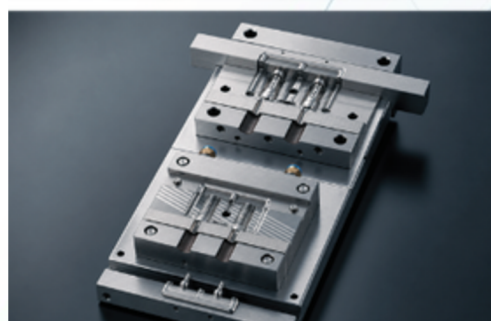

COMPANY PROFILE
会社案内

Company Profile

会社概要

Company Name	EX CO., LTD.
Established	October 1971
President	Kazushi Fujii
Paid Capital	JPY 50,010,000
Core Businesses	Connector Design & Manufacturing Tooling & Testing Equipment OEM/ODM Manufacturing
Head Office	4-6-2 Kukodori, Matsuyama, Ehime 791-0054 Japan TEL: (089) 973-2711 FAX: (089) 973-2880 URL: https://www.exjapan.com/
Locations	- Japan: Tokyo, Osaka, Kyoto, Ehime (Uchiko) - Overseas: Indonesia, China, Hong Kong
Major Customers	PHC Corporation Sony Corporation Panasonic Corporation and others
Certifications	ISO9001 ISO14001 SONY GP

Connecting Technology Creating The Future

Supporting manufacturers since 1971 through connectors, tooling, and OEM/ODM solutions.

EX is a Japanese manufacturer specializing in connector engineering, precision tooling, and OEM/ODM manufacturing, backed by decades of practical production expertise.

Our technologies are used in products people rely on every day across the audio, communication, automotive, medical, beauty, and industrial sectors.

Working closely with our customers, we transform ideas and requirements into dependable, high-quality manufactured products—from precision components to complete OEM/ODM solutions.

Committed to reliable technology, consistent quality, and responsive support, EX helps customers build better products with confidence.

Business & Applications

事業内容・用途分野

Three Core Businesses

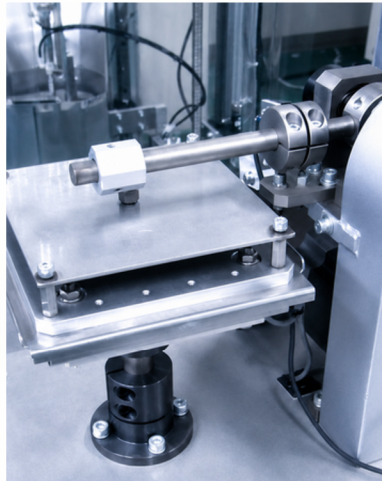

1 Connectors

Reliable connector solutions backed by decades of design and manufacturing expertise.

2 Tooling & Testing Equipment

Precision tooling and testing equipment that support stable quality and efficient production.

3 OEM/ODM Manufacturing

Flexible manufacturing solutions tailored to customer requirements, from precision components to complete assemblies.

Our Technologies Serve Diverse Industries

Audio

Reliable plugs, jacks, and connector solutions for professional and consumer audio equipment.

Telecommunications

Compact, high-performance connector solutions for telecommunications and communication devices.

Automotive

Supporting automotive applications with the durability and reliability required for in-vehicle equipment.

Medical and Beauty

Precision components and assembled products supporting medical and beauty equipment.

Industrial

Precision components, tooling, and testing equipment that improve manufacturing quality and productivity.

Our Six Strengths

エクセル電子の6つの強み

Over 50 Years of Manufacturing Experience

1 Waterproofing & Miniaturization

Compact connectors designed for waterproof performance and reliability.

2 Engineering Expertise Built on Experience

Design and engineering know-how developed through long-term manufacturing experience.

3 Quality for Demanding Applications

Quality control for products requiring precision, consistency, and reliability.

4 Flexible Manufacturing Solutions

Tailored proposals including waterproofing, assembly, and application-specific design.

5 Integrated Production Support

Support from design and prototyping to manufacturing, inspection, and delivery.

6 Production Network in Asia

Production in Japan and overseas for stable supply and responsive support.

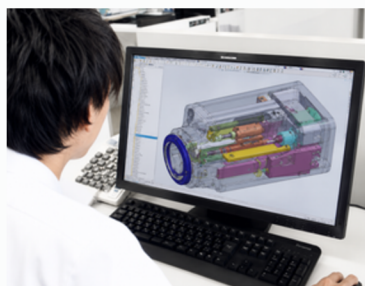

Production & Quality

生産体制と品質管理

Production Process

1 Development & Design

Design, prototyping, and evaluation based on customer requirements.

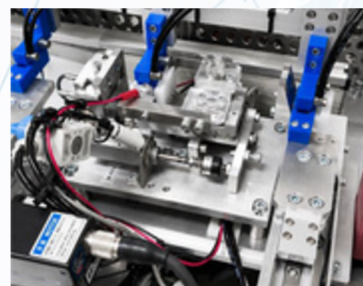

2 Production Engineering

Process, tooling, and equipment design for stable production.

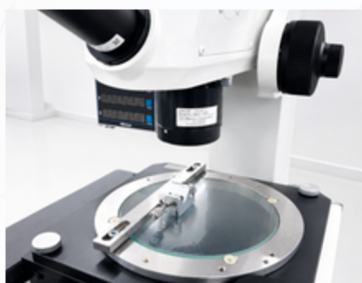

3 Manufacturing

Molding, stamping, assembly, and other processing technologies.

4 Quality Inspection

Dimensional, appearance, continuity, and product-specific inspections.

5 Delivery

Reliable delivery through controlled production and logistics.

Quality Assurance System

Thorough Quality Control

Quality control from incoming inspection to shipment.

Reliable Equipment

Measuring and testing equipment for accuracy and reliability.

Skilled Technicians

Skilled technicians supporting stable manufacturing quality.

International Standards

ISO-certified quality and environmental management systems.

Products & Manufacturing Technologies

精密部品

Precision Components

Supporting specialized applications through precision manufacturing.

Sub-**100** μm
Tip Diameter
Capability

From prototyping to mass production

Connector Components

Connector components manufactured using thin-sheet stamping, deep drawing, and precision molding technologies.

Precision Metal Components

Precision metal components requiring micro-machining and high-accuracy polishing.

Micro Shaft Components

Micro shaft components requiring exceptional straightness, dimensional accuracy, and consistent quality.

Our Strengths

Precision Microfabrication

Advanced manufacturing capabilities for ultra-fine tips, micro shaft components, and other precision parts.

Controlled Quality

Strict quality control to meet the demanding requirements of specialized applications.

Flexible Manufacturing

Flexible support from prototyping and small-lot production to mass production.

Products & Manufacturing Technologies

ケーブルアセンブリ

High-Quality Cable Assemblies

Reliable cable assemblies for diverse applications.

Precision Multi-Core Cable Assemblies

Fine-pitch, multi-core, and fine-wire cable assemblies.

Coiled Cord Assemblies

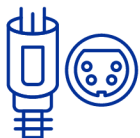

Flexible, durable assemblies for medical and control equipment.

OEM Automotive Harnesses

OEM harness manufacturing for automotive applications.

Our Scope of Support

Connector Development, Design, and Manufacturing

In-house connector development, design, and manufacturing capabilities.

Cable and Harness Procurement

Cable and harness procurement through trusted partners.

Assembly and Inspection

Assembly and inspection, including crimping, soldering, and continuity testing.
